

## **Month 1: Strengthening Frontend Skills & Setting Up Your Online Presence**

| Week   | Focus Area                 | Tasks & Deliverables                                                                                                                                                                                                                                            |
|--------|----------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Week 1 | React Deep Dive            | <ul style="list-style-type: none"><li>- Learn advanced React concepts (hooks, context API, state management).</li><li>- Build &amp; complete a To-Do List app with local storage.</li><li>- Push the project to <b>GitHub</b> with a detailed README.</li></ul> |
| Week 2 | Portfolio Website & GitHub | <ul style="list-style-type: none"><li>- Start building your personal portfolio website.</li><li>- Upload at least one project to GitHub.</li><li>- Share progress on LinkedIn.</li></ul>                                                                        |
| Week 3 | Frontend Project 1         | <ul style="list-style-type: none"><li>- Start Project 2 (e.g., Blog App with API fetching).</li><li>- Focus on responsive design &amp; animations.</li><li>- Write a LinkedIn post about what you've learned so far.</li></ul>                                  |
| Week 4 | Networking & Open Source   | <ul style="list-style-type: none"><li>- Contribute to one open-source project (simple issue).</li><li>- Engage with 10+ LinkedIn tech professionals.</li><li>- Complete your portfolio website &amp; push it live.</li></ul>                                    |

### End of Month 1 Deliverables:

- 1 React project (To-Do List) on GitHub.
  - Portfolio website (even if basic).
  - 1 LinkedIn post.
  - Basic open-source contribution.
-

## Month 2: Building More Projects & Backend Basics

| Week   | Focus Area                              | Tasks & Deliverables                                                                                                                                                                                        |
|--------|-----------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Week 5 | Frontend Project 2 (Intermediate Level) | <ul style="list-style-type: none"><li>- Finish and polish Blog App with API fetching.</li><li>- Add authentication (e.g., Firebase Auth).</li><li>- Share progress on LinkedIn.</li></ul>                   |
| Week 6 | Backend Basics (APIs & Express.js)      | <ul style="list-style-type: none"><li>- Learn Express.js and build a simple REST API.</li><li>- Connect the API to your frontend projects.</li><li>- Push a backend project to GitHub.</li></ul>            |
| Week 7 | Frontend Project 3 (Complex UI Design)  | <ul style="list-style-type: none"><li>- Start Dashboard UI project.</li><li>- Implement charts and authentication.</li><li>- Engage on LinkedIn &amp; write a blog post about frontend struggles.</li></ul> |
| Week 8 | Networking & Open Source                | <ul style="list-style-type: none"><li>- Contribute to another open-source project.</li><li>- Apply for at least 2 internships.</li><li>- Connect with tech recruiters on LinkedIn.</li></ul>                |

### ✓ End of Month 2 Deliverables:

- 2 React projects on GitHub.
- Basic Express.js API built & deployed.
- Internship applications started.
- 2nd open-source contribution.

## **Month 3: Expanding Skills & Real-World Experience**

| Week    | Focus Area                              | Tasks & Deliverables                                                                                                                                                                                            |
|---------|-----------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Week 9  | Final Frontend Project (Full-Stack App) | <ul style="list-style-type: none"><li>- Start E-commerce app (frontend + backend).</li><li>- Set up a Node.js backend with Express.</li><li>- Implement a database (Firebase or MongoDB).</li></ul>             |
| Week 10 | Freelancing & Real Work                 | <ul style="list-style-type: none"><li>- Apply for freelance gigs on Upwork, Fiverr.</li><li>- Complete your E-commerce app and deploy it.</li><li>- Write a LinkedIn post about your project journey.</li></ul> |
| Week 11 | Resume & Internship Push                | <ul style="list-style-type: none"><li>- Finalize your CV &amp; cover letter.</li><li>- Apply for 5 more internships.</li><li>- Reach out to tech mentors &amp; developers for guidance.</li></ul>               |
| Week 12 | Interview Prep & Open Source            | <ul style="list-style-type: none"><li>- Practice technical interview questions.</li><li>- Contribute to one more open-source project.</li><li>- Attend one virtual tech event or webinar.</li></ul>             |

### End of Month 3 Deliverables:

- Full-stack E-commerce app.
- Freelance experience started.
- Resume finalized & 5+ internship applications sent.
- Tech networking & mentor connections made.

## Month 4: Internship Readiness & Portfolio Polishing

| Week    | Focus Area                          | Tasks & Deliverables                                                                                                                                                                                                           |
|---------|-------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Week 13 | Polishing Portfolio & GitHub        | <ul style="list-style-type: none"><li>- Refine your portfolio website.</li><li>- Add case studies for your projects.</li><li>- Record a short video walkthrough of your projects.</li></ul>                                    |
| Week 14 | Mock Interviews & Internship Push   | <ul style="list-style-type: none"><li>- Practice DSA &amp; system design basics.</li><li>- Schedule mock interviews with peers or mentors.</li><li>- Apply for 5 more internships.</li></ul>                                   |
| Week 15 | Tech Talks & Content Creation       | <ul style="list-style-type: none"><li>- Write a detailed blog post on React or frontend topics.</li><li>- Record a short tech talk and post on LinkedIn.</li><li>- Engage in Twitter Spaces or LinkedIn discussions.</li></ul> |
| Week 16 | Final Internship Push & Reflections | <ul style="list-style-type: none"><li>- Apply to final batch of internships.</li><li>- Connect with tech professionals in companies hiring interns.</li><li>- Reflect on what's worked well and what to improve.</li></ul>     |

### End of Month 4 Deliverables:

- Portfolio complete with case studies & video walkthroughs.
- Internship applications (10+ sent).
- Interview prep & mock interview experience.
- LinkedIn visibility increased.
